### ON Commercial Construction Completes SEKO Logistics Project

AUGUST 25, 2015 – SANTA CLARA, CA – ON Commercial Construction (OCC), a Silicon Valley based general contractor, announced today it has completed construction for SEKO Logistics, a global supply chains solutions corporation.

The building improvement project stands at 191,833 total square feet located at 33300 Dowe Avenue in Union City, CA. “This mixed use project was on a fast-track schedule for building renovation and seismic upgrade,” says OCC president Lowell R. Mazon. OCC orchestrated 16,000 square feet of new expansion slabs, concrete surface refinishing, re-roofing, drought resistant landscaping, exterior ADA improvements, tenant improvement, office and sales, shipping and receiving area and new mechanical systems and restrooms. The new space is now Title 24 compliant.

"Not stopping the flow of business is always a concern with construction projects," says Arun Mathur, SEKO director of operations. "Not only does OCC understand this, they found creative solutions for us and expedited the whole process."
